

**DYNADURE™**

Powder Coatings for Aluminum Extrusions

***Valspar®***

# DYNADURE™

Valspar's Dynadure™ powder coatings are specifically designed to meet the needs of the architectural market. Formulated using durable and super durable polyester resins, Dynadure™ will withstand the effects of the environment to allow for a long-lasting finish on aluminum extrusions.

Not only does Dynadure™ provide a high quality, extremely durable finish to aluminum extrusions but Dynadure™ is also the most environmentally responsible option available as Dynadure™ is a zero VOC emission product. By selecting Valspar's Dynadure™ product line you are reducing concerns and costs associated with air pollution prevention and hazardous waste stream generation.

Dynadure™ is available in a variety of colors and gloss ranges. The 300 series meets AAMA 2603 specifications for light commercial and residential needs. For brighter colors or lower gloss looks, choose from the 350 Series designed to meet AAMA 2603 specifications. For commercial and high-end residential products, select from the color palette of the 400 series designed to meet AAMA 2604 specifications.
